EDUCATION

2017 - 2021

WEST BENGAL UNIVERSITY OF
TECHNOLOGY

- Bachelor of Technology(B.Tech)
- Major : Computer Science and Engineering
- GPA : 8/10

SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **API & Web Testing:** REST Assured, Postman, Selenium, Playwright, Cucumber, TestNG
- **Mobile Testing Tools:** Appium, BrowserStack (for mobile/cloud device testing)

PROFILE

Senior SDET with over 4 years of experience in building and scaling test automation frameworks across FinTech, Banking, and Data Services domains. Skilled in API automation using REST Assured and Postman, and UI testing with Selenium and Playwright. Experienced in leading full-cycle testing efforts, designing reusable and maintainable automation architectures, and applying DevOps practices with Docker, Kubernetes, AWS (EC2, EKS), and Jenkins CI/CD. Well-versed in test strategy, Agile collaboration, and team mentoring, delivering stable, high-quality releases in fast-paced environments. Eager to lead impactful QA initiatives in high-growth product teams by leveraging deep technical expertise in automation, architecture, and DevOps practices.

WORK EXPERIENCE

Freecharge Payment Technologies Pvt.Ltd | Feb 2025 - Present
Senior SDET

- Architected and led the complete overhaul of the legacy API automation framework using Java 21, Spring Boot, TestNG, REST Assured, and MongoDB, introducing modular design patterns (POM, Singleton, Factory) to enhance reusability and maintainability. Achieved a 30% increase in execution speed and a significant reduction in flaky test cases.
- Designed and implemented comprehensive API automation suites using REST Assured and Postman, focusing on scalable and reusable components, enhanced validation layers, and dynamic payload handling.
- Containerized the test framework using Docker, and configured parallel executions with Kubernetes (EKS), resulting in a 40% reduction in end-to-end test suite execution time and seamless CI integration.
- Built and integrated a real-time reporting dashboard with Google Meet and email notifications, enabling proactive communication and visibility across QA, DevOps, and Product teams.

- **Performance & Load Testing Tools:** JMeter, Fiddler
- **DevOps & CI/CD:** Docker, Kubernetes, Jenkins, Maven
- **Cloud & Infrastructure:** AWS (EC2, Lambda, EKS, S3)
- **Databases:** MySQL, Microsoft SQL Server, MongoDB
- **SCM & Tracking:** Git, Bitbucket, JIRA, Zephyr
- **Frameworks & Design Patterns:** Spring Boot, Page Object Model, Factory, Singleton
- **Methodologies:** BDD / TDD, Shift-left Testing, Test Strategy & Governance, Regression Optimization
- **OS & Environments:** Windows, Linux

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- German (Basics)

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- JAVA Certification – NPTEL
- Software Testing – NPTEL
- Selenium WebDriver with Java – Udemy

- Owned the end-to-end QA delivery of the 2FA Authentication module, defining test strategy, traceability matrix, scenario modeling, test data management, and UAT coordination. Delivered with zero production defects.
- Deployed and managed automation infrastructure on AWS EC2 & EKS, demonstrating strong DevOps capabilities and environment management.
- Actively participated in Agile ceremonies (sprint planning, stand-ups, backlog grooming, retrospectives), providing estimations, driving QA metrics, and ensuring continuous test delivery.

Nagarro Software Pvt Ltd.

| SEPT 2021 - JAN 2025

Automation Analyst

Project 1: Saudi Bank - FinTech Domain

- Developed and maintained a Selenium + Cucumber BDD framework, utilizing Page Object Model for UI test modularity. Optimized regression suite execution, achieving a 30% reduction in test cycle time.
- Collaborated with BAs and developers to define over 500+ high-priority test scenarios and tracked execution using JIRA and Zephyr, resolving 200+ issues across multiple sprints.
- Containerized test execution using Docker and ensured cross-browser compatibility through BrowserStack, covering key workflows across multiple environments and devices.
- Played a key role in Agile teams, involved in daily Scrum, sprint reviews, and retrospectives, ensuring quality goals aligned with sprint deliverables.

Project 2: LNRS - Data & Analytics Domain

- Engineered a hybrid framework using Playwright (UI) and REST Assured (API) to enable full-stack test coverage. The framework supported data-driven, parallel, and environment-specific executions.
- Authored and optimized over 1000+ JavaScript-based Playwright scripts, implementing dynamic locators, reusable utility functions, and test hooks for better coverage and maintainability.
- Conducted end-to-end SQL validations on MS SQL Server, ensuring backend data integrity before production deployments.
- Led test strategy, planning, execution, and reporting across multiple Agile releases, and seamlessly integrated automation pipelines with Jenkins for nightly and on-demand runs.
